

PM Assistant

AI email drafting for Queensland property managers

Every tenant and owner email - replied to, compliant, and in your voice. Your property manager reviews and sends. The AI never sends on its own.

The problem

Property managers lose hours every day to the inbox - and a wrong answer on notice periods, entry rules, or an after-hours emergency is a real compliance risk under the 2024-25 Queensland rental reforms.

What it does

- Reads every inbound email and drafts a ready-to-send reply
- Categorises and triages urgency; flags statutory emergencies (e.g. no hot water = s214) and raises owner alerts
- Applies QLD tenancy law (RTRA Act + 2024-25 reforms) to notice periods and entry rules
- Lands in a daily review queue - your PM edits, approves, and sends

Why property managers choose it

- Around 1.5-2.5 hours back, per property manager, per day
- Handle more doors without hiring another PM
- Fewer compliance slips and less after-hours stress
- Also: one-click statutory documents, maintenance coordination, and automated arrears / renewal / inspection reminders

Built on trust

The AI drafts; your PM decides. Nothing is ever sent automatically, each agency's data is fully isolated, and every document is a draft to review - not legal advice.

Simple pricing

Per door, per month. Start with a no-commitment pilot: we connect one mailbox, you review the drafts, and you decide.

See it work on a live email in 10 minutes.
